PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with 4+ years of experience building enterprise B2B e-commerce experiences across GCC markets. Strong in React.js, Next.js, TypeScript, frontend architecture, state management, API integration and performance optimization. Contributed to Redington Partner Commerce workflows covering standard/organic deals, partner-created RFQ quotations, price negotiation and approval journeys involving Sales, PG and Ecommerce teams. Improved storefront Largest Contentful Paint by 54% (5.0s to 2.3s) and mentor frontend developers through code reviews and technical guidance.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI
State & API: Redux Toolkit, TanStack Query, REST APIs, GraphQL, API integration
Performance: SSR, CSR, ISR, code splitting, lazy loading, Core Web Vitals, Lighthouse, New Relic
Enterprise & Security: SAP S/4HANA integration, Microsoft Entra SSO, Okta, RBAC, Zod, DOMPurify
Tools & Platforms: Git, Jenkins CI/CD, React Testing Library, PostgreSQL, Redis, RabbitMQ
Internationalization: Arabic/English/French interfaces, RTL layouts

EXPERIENCE

Solveda (A Saksoft Company) — Noida, India May 2024 – Present

Software Engineer | Redington Partner Commerce (GCC client)

Enterprise B2B commerce platform supporting partner operations across UAE, Saudi Arabia, Qatar and Bahrain.

- **Frontend architecture:** Developed and enhanced modular commerce experiences using React.js, Next.js and TypeScript for enterprise partners across UAE, Saudi Arabia, Qatar and Bahrain.
- **Deal and RFQ journeys:** Built partner-facing workflows for standard/organic deals and RFQ quotation creation, allowing partners to submit quote requests and participate in negotiated pricing journeys.
- **Cross-functional approvals:** Implemented quotation review, negotiation and approval journeys with hand-offs across Sales, PG and Ecommerce teams, making complex B2B processes easier to follow.
- **Checkout and contracts:** Contributed to multi-store checkout and contract-based purchasing workflows, implementing frontend business rules and customer-specific purchase experiences.
- **ERP and inventory:** Built frontend data models and API state layers for SAP S/4HANA-connected inventory visibility and stock-blocking workflows across regional storefronts.
- **Performance engineering:** Reduced storefront LCP from 5.0s to 2.3s (54%) through code splitting, caching and rendering optimizations, with performance monitored using New Relic.

EXPERIENCE (CONTINUED)

Solveda (A Saksoft Company) — Redington Partner Commerce May 2024 – Present

- **Payments and security:** Contributed to Mastercard MPGS and Noqodi payment journeys, enterprise credit workflows, Microsoft Entra SSO, Okta and permission-aware RBAC interfaces.
- **Technical mentoring:** Mentored frontend developers through code reviews, architecture discussions and implementation guidance, promoting reusable components and maintainable engineering practices.

IdeaSailor Technology — India Sep 2022 – Apr 2024

Junior Software Engineer | Clients: Wolters Kluwer and Lapeyre

- **Enterprise application development:** Developed and enhanced cross-border enterprise applications for Wolters Kluwer and Lapeyre using React.js, Next.js and TypeScript.
- **Reusable UI architecture:** Built reusable components and modular frontend structures to improve consistency, maintainability and delivery efficiency.
- **Performance optimization:** Improved application performance through render optimization, lazy loading, memoization and Redux Toolkit improvements; reported project results included a 40% performance improvement.
- **REST API integration:** Integrated RESTful APIs and implemented frontend data flows, including loading, error and empty states for reliable user experiences.
- **State management:** Optimized Redux Toolkit state management and reduced redundant API requests by improving data flow and component-level state handling.
- **Production support:** Resolved application issues and collaborated with backend developers, QA engineers and stakeholders to deliver enhancements and support releases.

EDUCATION

Bachelor of Computer Applications (BCA) — Hierank Business School, Chaudhary Charan Singh University, Noida, India
